

# GLOBAL SPECTRUM SERIES 2024

On these pages you will see a summary of attendees and a collection of testimonials from those who took part in the events which made up the Global Spectrum Series in 2023.

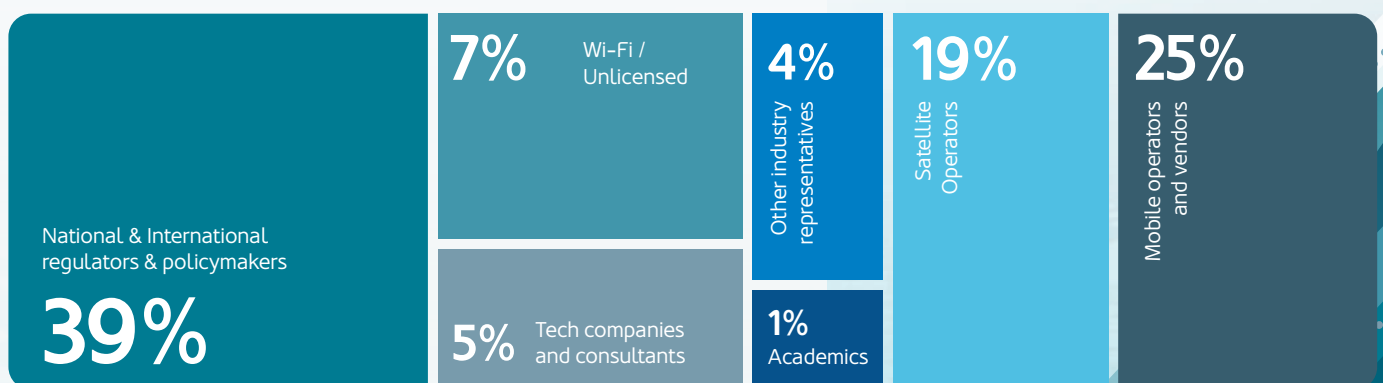

## THE GLOBAL SPECTRUM SERIES 2023

\* Includes national and international policy representatives (regulators, Governments, standards bodies, agencies etc.) from both within the event region and globally.

\*\* Please note that these figures are from the 2022 virtual event, as the 2023 edition is scheduled for early 2024 due to WRC-23.

## STAKEHOLDER GROUP BREAKDOWN 2023

The Global Spectrum Series addresses some of the hottest Spectrum management related topics. By inviting a balanced representation of governments and industries of various regions of the world, participants profit from an open discussion and acquire a broad view of the subject matter.

*Mario Maniewicz, Director, BR, ITU*

The Global Spectrum Series by Forum Global expertly navigates the complexities of spectrum management, uniting global voices in a pivotal, transparent dialogue. Essential for connectivity leaders. It's a must-attend.

*Masanori Kondo, Secretary General, APT*

I am grateful to have participated in a conference as well organized as this. As always, the Forum Global team has put together an excellent collection of speakers and moderators to discuss the most important topics relating to the coordination of spectrum management in the region.

*Diego Rojas, Independent  
Spectrum Consultant*

If you need to understand what are the spectrum battles, what is at stake, what are the emerging solutions in each region of the world, just attend these events.

*Eric Fournier, Chair, RSPG*
